CSC/Q0411: Digital Twin Engineer

Brief Job Description

A Digital Twin engineer will develop and maintain a digital twin solution for the manufacturing process. The CG Digital Twin Engineer will collaborate with cross-functional teams to create virtual replicas that enhance understanding, simulation, and optimization of physical assets and systems.

Personal Attributes

A digital twin engineer requires a combination of technical skills, creativity, and an understanding of user experience.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. CSC/N0517: Develop, and implement digital twin solution based on the behavior of physical object

2. CSC/N0518: Manage Data, Software, and Technical Support.

3. CSC/N1339: Collaboratively coordinate with the team

4. CSC/N0505: Follow health, safety and environment guidelines at workplace

5. DGT/VSQ/N0102: Employability Skills (60 Hours)

Qualification Pack (QP) Parameters

Sector	Capital Goods
Sub-Sector	Machine Tools, Dies, Moulds and Press Tools, Plastics Manufacturing Machinery, Textile Manufacturing Machinery, Process Plant Machinery, Electrical and Power Machinery, Light Engineering Goods, Defence Equipment, Fire-Fighting & Safety Equipment
Occupation	Design
Country	India
NSQF Level	5.5
Credits	19

Aligned to NCO/ISCO/ISIC Code	2144.0803
Minimum Educational Qualification & Experience	UG in relevant field (UG Degree in relevant field + 2 years of relevant experience or 3 Years UG Degree in Science and Technology (B.Sc / BCA) / 4 years BE, B.Tech (Electrical, Electronics, Mechanical, Mechatronics, Instrumentation and Control)* or 10th grade pass +3 years Diploma in relevant field + 5 year of relevant experience or Previous NSQC level 5 + 1.5 years of relevant experience *Subject to being offered as 6 months internship/ project)
Minimum Level of Education for Training in School	
Pre-Requisite License or Training	NA
Minimum Job Entry Age	24 Years
Last Reviewed On	NA
Next Review Date	31/01/2027
NSQC Approval Date	31/01/2024
Version	1.0
Reference code on NQR	QG-5.5-CG-02046-2024-V1-CGSC
NQR Version	1

CSC/N0517: Develop, and implement digital twin solution based on the behavior of physical object

Description

This NOS is regarding development and implementation of digital solution in the industries

Scope

The scope covers the following :

- Implementation and development of digital twin solution

Elements and Performance Criteria

Develop, and implement digital twin solution based on the behavior of physical object

To be competent, the user/individual on the job must be able to:

PC1. Develop and integrate digital twin models that accurately represent the physical system.
PC2. Ensure the fidelity of digital twin models to real-world counterparts.
PC3. Establish effective data synchronization between the physical system and its digital twin.
PC4. Minimize latency in data updates to maintain real-time representation.
PC5. Successfully integrate IoT sensor data into the digital twin for comprehensive monitoring.
PC6. Ensure seamless communication between the digital twin and connected sensors.
PC7. Optimize the performance of digital twin models for efficiency and responsiveness.
PC8. Implement strategies to handle large datasets without compromising system performance.
PC9. Ensure interoperability with existing systems and platforms for seamless integration.
PC10. Collaborate with relevant stakeholders to address compatibility issues.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the fundamental concept of digital twins, including their definition, purpose, and benefits in various industries.
KU2. Knowledge of integrating data from various sources (sensors, IoT devices, simulations) to create and maintain a digital twin.
KU3. Understanding of modeling techniques and simulation tools used to create and validate digital twins.
KU4. Knowledge of IoT devices and sensor technology used to collect real-time data for digital twins.
KU5. Understanding of data analytics methods and tools used to analyze data from digital twins and derive insights.
KU6. Knowledge of cloud computing infrastructure and platforms used to store and process data for digital twins.

KU7. Understanding of cybersecurity principles and practices to ensure the security and integrity of digital twin data.

KU8. Familiarity with specific industry requirements and standards for digital twins, such as manufacturing, healthcare, or smart cities

KU9. Knowledge of collaborative platforms and tools used to share and collaborate on digital twin data and models.

KU10. Understanding of the lifecycle management of digital twins, including updates, maintenance, and decommissioning.

KU11. Awareness of regulatory requirements and standards related to digital twins, such as data privacy and security regulations.

KU12. Knowledge of emerging technologies (e.g., AI, machine learning, blockchain) and their potential impact on digital twin development and implementation.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Ability to analyze complex data sets and derive meaningful insights to improve digital twin performance and reliability.

GS2. Capacity to identify issues with digital twin models or data and develop effective solutions to address them.

GS3. Ability to communicate technical concepts and findings to non-technical stakeholders, facilitating understanding and collaboration.

GS4. Thoroughness in creating and maintaining digital twin models to ensure accuracy and reliability.

GS5. Flexibility to adapt to changing project requirements and technologies in the field of digital twins.

GS6. Collaboration with cross-functional teams to develop and implement digital twin solutions effectively.

GS7. Efficient management of time and resources to meet project deadlines and deliverables.

GS8. Proficiency in programming languages such as Python, R, or MATLAB for data analysis and model development in digital twin projects.

GS9. Experience with simulation software (e.g., Simulink, ANSYS) for creating and validating digital twin models.

GS10. Ability to manage large datasets for digital twin applications, including data collection, storage, and processing.

GS11. Skills in project planning, execution, and monitoring to ensure successful implementation of digital twin projects.

GS12. Willingness to stay updated with the latest trends and technologies in digital twin development through self-learning and professional development opportunities.

CSC/N0518: Manage Data, Software, and Technical Support.

Description

This NOS is regarding management ,software and technical aspects of the industrial systems

Scope

The scope covers the following :

- Management of data, software and technical aspects

Elements and Performance Criteria

Manage Data, Software, and Technical Support.

To be competent, the user/individual on the job must be able to:

PC1. Adhere to coding standards and best practices in software development.

PC2. Produce high-quality, maintainable, and scalable code for digital twin applications.

PC3. Conduct rigorous testing of developed software to identify and resolve bugs and errors.

PC4. Implement unit testing, integration testing, and system testing as part of the development process.

PC5. Utilize version control systems to manage code changes systematically.

PC6. Maintain comprehensive documentation for developed software, including code comments and user manuals.

PC7. Embrace agile development methodologies for flexibility and adaptability.

PC8. Collaborate with cross-functional teams and stakeholders in iterative development cycles.

PC9. Implement robust security measures in software development to protect against cyber threats.

PC10. Adhere to cybersecurity best practices and address vulnerabilities promptly.

PC11. Meet project deadlines and milestones for software development.

PC12. Communicate effectively with project managers and team members regarding progress and potential delays.

PC13. Gather and incorporate user feedback into the software development process.

PC14. Iterate on software features based on user experience and requirements.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the fundamental concept of digital twins, including their definition, purpose, and benefits in various industries.

KU2. Knowledge of integrating data from various sources (sensors, IoT devices, simulations) to create and maintain a digital twin.

KU3. Understanding of modeling techniques and simulation tools used to create and validate digital twins.

KU4. Knowledge of IoT devices and sensor technology used to collect real-time data for digital twins.

KU5. Understanding of data analytics methods and tools used to analyze data from digital twins and derive insights.

KU6. Knowledge of cloud computing infrastructure and platforms used to store and process data for digital twins.

CSC/N1339: Collaboratively coordinate with the team

Description

This OS unit is about building relationships and working with people and groups inside and outside the organization, using skills and habits, to achieve the team goals and objectives

Scope

The scope covers the following :

- This unit/task covers the following:
- Creating team environment
- Communicating - giving and receiving
- Working cooperatively
- Participating in team decision making
- Demonstrating Sense of Responsibility
- Showing respect for opinions, customs, and preferences

Elements and Performance Criteria

Communicate effectively at the workplace

To be competent, the user/individual on the job must be able to:

PC1. exchange information and instruction with colleagues, and seek clarifications and feedback

PC2. assist colleagues where required

PC3. follow business communication etiquette in all interactions and communicative formats (online, digital, and in-person)

PC4. document and share all relevant information with stakeholders in agreed formats and as per agreed timelines

Work effectively

To be competent, the user/individual on the job must be able to:

PC5. identify and obtain clarity regarding organisational, team and own goals and targets

PC6. prioritise and plan work in order to achieve goals and targets

PC7. monitor own and team performance as per agreed plan

PC8. complete duties accurately, systematically and within required timeframes

PC9. express emotions appropriately at the workplace and manage own response to heightened emotions

PC10. maintain orderliness and cleanliness in the work area Maintain and enhance professional competence

PC11. identify own strengths and weaknesses in relation to goals and targets

PC12. adapt self, service, or product to meet success criteria

PC13. seek and select opportunities for continuous professional development

PC14. formulate a professional development plan to enhance capabilities

PC15. build or contribute to the organizational knowledge base of cases, clients, issues, solutions, and innovations

PC16. examine developments and trends in field of work and their potential impact on work

PC17. take feedback from peers, supervisors and clients to improve own performance and practices

Work in a disciplined and ethical manner

To be competent, the user/individual on the job must be able to:

PC18. perform tasks as per workplace standards, organizational policies and legislative requirements

PC19. display appropriate professional appearance at the workplace and adhere to the organizational dress code

PC20. demonstrate responsible and disciplined behavior at the workplace such as punctuality; completing tasks as per given time and standards; demonstrating professional behavior at all times, adopting environment- friendly practices, etc.

PC21. identify the cause of conflict and options for resolution with peers or escalate grievances and problems to appropriate authority as per procedure for conflict resolution

PC22. protect the rights of the client and organization when delivering services

PC23. ensure services are delivered equally to all clients regardless of personal and cultural beliefs

PC24. operate within an agreed ethical code of practice and report unethical conduct to the appropriate authorities

PC25. follow organizational guidelines and legal requirements on disclosure and confidentiality

Uphold social diversity at the workplace

To be competent, the user/individual on the job must be able to:

PC26. recognize and evaluate biased practices against underrepresented groups like women and persons with disabilities, in workplace systems and processes

PC27. identify and report discrimination and harassment based on gender, disability, or cultural difference at the workplace

PC28. use inclusive or neutral language and gestures in all interactions

PC29. respect the personal and professional space of others

PC30. access grievance redressal mechanisms as per legislations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. the organisation's policies and procedures for working with colleagues, roles and responsibilities

KU2. the importance of effective communication and establishing good working relationships with colleagues

KU3. different methods of communication and the circumstances in which it is appropriate to use these

KU4. the importance of creating an environment of trust and mutual respect

KU5. the implications of own work on the work and schedule of others

KU6. different types of information that colleagues might need and the importance of providing this information when it is required

KU7. the importance of helping colleagues with problems, to meet quality and time standards as a team

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write instructions, guidelines, procedures, messages, emails, and other media in language of the workplace

GS2. communicate in common and technical terms in language of the workplace

GS3. listen effectively and orally communicate information

GS4. be punctual, do work scheduling and reporting

GS5. comply with workplace practices and ethics

GS6. maintain cleanliness and healthy environment

GS7. be customer friendly - understand real needs of the customer and suggest most appropriate solution

GS8. be safety conscious and avoid risk

GS9. be observant, vigilant, and security consciousness

GS10. respond, handle problem, and escalate as necessary

GS11. ask for clarification and advice from concerned persons

GS12. make decisions on a suitable course of action or response keeping in view resource utilization while meeting commitments

GS13. plan and organize work to achieve targets and deadlines

CSC/N0505: Follow health, safety and environment guidelines at workplace

Description

This OS unit is about following adequate safety procedures to make work environment healthy and safe

Scope

The scope covers the following :

- This unit/task covers the following:
- Adhere to standard safety procedures of the company
- Follow healthy practices and posture
- Practice waste management and recycling
- Conserve material and resources

Elements and Performance Criteria

Adhere to standard safety procedures of the organisation

To be competent, the user/individual on the job must be able to:

PC1. comply with general safety procedures and those for handling equipment, tools, chemicals, and hazardous material, as prescribed and followed in the organisation

PC2. remove finger rings or any other metal objects likely to interfere with the work

PC3. ensure that identification badge or any other object worn around the neck or on the clothing does not get caught in any rotating machine, or otherwise interfere with the work

PC4. use appropriate safety devices such as goggles, gloves, ear plugs, caps, ESD pins, covers, shoes, helmets etc. recommended for the work being performed

PC5. inform, escalate, or raise alarm about any suspicions, unaccounted hazardous material, devices, or other objects found in the premises

PC6. inform, escalate, or raise alarm about any breach of safety or security procedure in the organisation

PC7. help achieve zero accidents goals at work

PC8. avoid damage to sensitive electronic components due to negligence of ESD procedures

PC9. participate regularly in fire drills or other safety related workshops organised by the organisation

PC10. follow strictly all access control and perimeter safety procedures in designated factory areas such as robotic work stations, automated production lines, automated material movement and other potentially risky operations

PC11. ensure that other people follow all access control and perimeter safety procedures in designated factory areas and help avoid accidents

PC12. use emergency switches or other mechanisms of stopping a machine immediately in case any emergency situation has developed or about to happen

PC13. ensure that electrical equipment are properly grounded

PC14. follow Cyber Security guidelines and be vigilant at workplace

PC15. proceed to designated safe assembly area immediately on hearing fire alarm

Follow healthy practices and posture

To be competent, the user/individual on the job must be able to:

PC16. wash hands and use sanitizers as recommended to prevent spread of diseases

PC17. follow common personal hygiene practices

PC18. maintain appropriate posture, especially in long hours of sitting or standing position and in handling heavy materials

PC19. participate in company organised health sessions such as exercises, games, yoga, physiotherapy, and other activities

PC20. handle heavy and hazardous materials with care, while maintaining appropriate posture, using suitable tools, and handling equipment such as trolleys, jacks, and ladders

PC21. learn and apply first aid devices available in the workplace

PC22. learn and apply safety and handling procedures for electrical shock and electrocution

PC23. learn and apply emergency medical help services

PC24. follow workplace decorum and avoid emotional outbursts or inappropriate language

PC25. prevent any harassment at workplace

Practice waste management and recycling

To be competent, the user/individual on the job must be able to:

PC26. identify recyclable, non-recyclable, and hazardous waste generated in the workplace and comply with their disposal procedures

PC27. dispose non-recyclable waste and hazardous waste following recommended processes

PC28. deposit recyclable and reusable material at identified locations

PC29. support education and compliance of waste management processes

Conserve material and resources

To be competent, the user/individual on the job must be able to:

PC30. identify ways to optimize usage of material and resources such as water, electricity, energy in various tasks, activities, and processes

PC31. check for spills and leakages of material in various tasks, activities, and processes and plug them

PC32. escalate the leakage issue to appropriate authority if needed

PC33. carry out routine cleaning of tools, machines, and equipment and maintain them in good working condition to optimize efficiency and wastage

PC34. check if the equipment is functioning normally before commencing work and rectify or report any malfunctioning to the responsible agency

PC35. check for any odour, sparks, fumes, emission, unusual vibration, noise, or any other objectionable presence in the environment and take immediate corrective action followed by report to responsible agency

PC36. ensure electrical equipment are properly connected for use and are switched off when not in use

PC37. support education and compliance of resource conservation processes

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. company policies on workplace, environment, and personnel management
KU2. company policy on occupational safety and health
KU3. professional hazards related to nature of work and how to deal with them
KU4. how to maintain the work area safe and secure
KU5. how to handle hazardous materials, tools, and equipment
KU6. emergency procedures for fire, electrocution, physical injury, wounds, etc.
KU7. need for proper body posture and use of appropriate handling equipment
KU8. understand electrical grounding practices
KU9. common sources of pollution and ways to minimize it
KU10. waste management - categorisation, colour coding, handling, and disposal procedure
KU11. organisation policies and procedures for minimizing waste
KU12. efficient use of electricity, material, and water in processes
KU13. organization policies regarding network usage and security
KU14. norms for professional behaviour at workplace and dealing with deviations

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. communicating in the language of the workplace
GS2. reading and interpreting documents, drawings, symbols, and instructions
GS3. operating computer and common office equipment and diagnosing common electrical and interconnection problems
GS4. writing notes, reports, observations, emails
GS5. using personnel protective devices
GS6. maintaining clean and healthy work environment
GS7. using and operating safety devices and equipment
GS8. conducting work following workplace security processes and rules
GS9. responding to emergency situations pertaining to workplace
GS10. understanding people and collaborating to create a healthy workplace

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.

2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.

3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.

4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training centre (as per assessment criteria below).

5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training centre based on these criteria.

6. To pass the Qualification Pack assessment, every trainee should score a minimum of 70% of %

aggregate marks to successfully clear the assessment.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(**Please note**: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

TVET	Technical and Vocational Education and Training

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
